

GUDALA ROHITH REDDY

12-7-144 New Mettuguda, Secunderabad, Telangana, India | +91 9381889622 | rohithreddy1304@gmail.com

EDUCATION

Bachelor of Technology (B.Tech) – Cyber Security

St. Peter's Engineering College | 2026 – Present (3rd Year)

CGPA: 7.56

Relevant Coursework: Cyber Security, Computer Networks, Operating Systems, DBMS, Data Structures, Cryptography, Ethical Hacking.

SKILLS SUMMARY

Programming Languages: Python, Python (Basic), C, Java, TypeScript, JavaScript

Web Technologies: HTML5, CSS3, Next.js, Tailwind CSS, Bootstrap 5

Database & Storage: SQLite, SQL (Basics), Relational Schemas

Tools & Platforms: Git, GitHub, VS Code, Linux Terminal

Core Concepts: Cyber Security, Data Structures, Computer Networks, DBMS, SAST/DAST

Soft Skills: Problem Solving, Quick Learning, Adaptability, Technical Communication

PROJECTS & ACADEMIC EXPERIENCE

VulnScan – Real-Time Web Vulnerability Scanner

Python • Flask • SQLite • Bootstrap 5

- Developed a web-based vulnerability scanner capable of TCP port scanning, service detection, and HTTP security header analysis.
- Implemented automated risk assessment with actionable security recommendations.
- Generated professional PDF and text-based security reports and maintained scan history for analysis.

PhishGuard – AI Phishing Email Detection System

Python • Flask • Scikit-learn • SQLite

- Built a machine learning application to detect phishing emails using TF-IDF and custom feature engineering.
- Designed an explainable AI interface highlighting suspicious content and calculating a risk score.
- Achieved high-accuracy email classification through model evaluation and optimization.

Secure Login System

Python • Flask • SQLite • HTML • CSS • JavaScript

- Developed a secure authentication system using hashed passwords, session management, and parameterized database queries.
- Implemented input validation and security best practices to protect against common web vulnerabilities.
- Added optional Two-Factor Authentication (2FA) to strengthen account security.

Buddy AI (In Progress)

Python • PyQt6 • AI Integration

- Developing a modular desktop AI assistant for Windows featuring voice interaction, intelligent automation, and long-term conversational memory.
- Designing a scalable architecture supporting plugins, productivity tools, and system automation.

TECHNICAL LEARNING & ACTIVITIES

- Participated in College Hackathons & Competitive Coding Challenges.
- Completed technical training in Programming, Cybersecurity Fundamentals, and Web Development.
- Continuously building real-world projects combining Cyber Defense, Machine Learning, and Full Stack Architecture.
